Re: Freedom of Information Act Request re: Long Savannah JPN SAC 2015-00012

To Whom It May Concern:

Pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, the Southern Environmental Law Center ("SELC") submits this request for public records in the possession or control of the Environmental Protection Agency ("EPA") related to the development of Long Savannah. Specifically, we request:

1. All records within the EPA file pertaining to joint public notice SAC 2015-00012 for the proposed Long Savannah, Village Green, and Bulow County Park development.

Electronic delivery is preferred in order to lessen the burden on EPA staff. For the purposes of this request, the term "records" includes all electronic materials, data, tables, spreadsheets, formulas, directives, observations, impressions, and contracts in the possession, custody, or control of the EPA. Our request also specifically includes responsive documents and records prepared by, created by, or in the possession, custody, or control of the EPA's agents, contractors, and subcontractors. Our request also specifically includes all responsive documents and records not already publicly available.

SELC requests that you waive any search and duplication fees and provide the requested records without charge, or at a reduced charge, pursuant to 5 U.S.C. § 552(a)(4)(A)(iii). The disclosure of the requested materials would be in the public interest because it is likely to contribute significantly to public understanding of the EPA's activities and is not in the commercial interest of SELC. As a 501 (c)(3) non-profit public interest organization, SELC lacks any commercial interest in the records, and none of its clients have any such interest. Courts have recognized that Congress intended FOIA's fee waiver provision to be "liberally construed in favor of waivers for noncommercial requesters." *McClellan Ecological Seepage Situation v. Carlucci*, 835 F.2d 1282, 1284 (9th Cir. 1987). SELC works to protect the natural resources of the South Carolina coastal plain and, specifically, to gather, analyze, and disseminate public information about the impacts of projects on wetlands, wildlife, water quality, and other resources in South Carolina. SELC is dedicated to using the power of the law to similarly protect clean air, clean water, and special places throughout all six Southeastern states in which we work: Alabama, Tennessee, Georgia,

South Carolina, North Carolina, and Virginia. SELC does not charge its clients for legal advice or representation; instead, SELC provides such advice and representation free of charge within the scope of its mission.

We seek these records in order to inform the public about the risk posed to the resilience of the Charleston community by these types of damaging development proposals that do not adequately recognize the value of wetlands and their flood storage benefits. Disclosure of records responsive to this request will aid the public's understanding of the scale of coastal development in their state. SELC has extensive experience in reviewing, understanding, synthesizing, and communicating information relating to coastal systems in our Southeastern states, advancing public understanding and dialogue.<sup>1</sup>

Further, this enhanced understanding will accrue to a significant segment of the public. In addition to making information available on our website to anyone searching for it,<sup>2</sup> SELC also actively distributes information to the public through newsletters and other publications.<sup>3</sup> SELC also disseminates information by participating in meetings and conferences. Further, SELC coordinates with a diverse collection of partner organizations actively working to participate in coastal system policy. Each of these partners has its own base of supporters to which it will disseminate the information disclosed pursuant to this request. SELC's and its partners' supporters are directly affected by decisions made by federal agencies through the EPA's permitting process. As a result, responsive information about the scale of shoreline engineering will be shared with a substantial portion of the public, and, specifically, a portion of the public affected by and involved with participation in the EPA's processes.

Should our request for reduced or waived fees be denied, we are prepared to bear the reasonable costs necessary to fulfill this request, although we ask that you contact us prior to fulfilling the request should the fees exceed \$100. We reserve our rights to appeal a denial of our request for a fee waiver or reduction.

FOIA directs a responding agency to make a "determination" on any request within twenty working days of receipt. 5 U.S.C. § 552(a)(6)(A). We specifically request that you comply with the statutory deadline. Should our request be denied, we ask that you inform us of the grounds for denial and the specific administrative appeal rights that are available. Id.

We are willing to work with your agency to minimize the work necessary to respond. We are available to review documents prior to any duplication and are willing to discuss other ways to facilitate your response to our FOIA request. We also will happily accept an electronic copy of the requested information, and in fact prefer this method of delivery, in order to further minimize effort.

---
